Hello! Thanks for buying "Elemental 2d FX pack". You can use this pack with your favourite software: Adobe Premier, Adobe After Effects, Sony Vegas, Final Cut, Edius etc.

_____

Pack description
- ❏ Rendered animations - animations with merged layers and with glow effects.
- ❏ Raw layers - separated layers for each animation
- ❏ Video Thumbnails - animation previews
- ❏ Bonus - After Effects project files with video preview composition and FX-animation(CS5.5+ compatibility).

_____

## There are two ways to use animations:
     I. Use animations from "Rendered animations" folder.
     II. Use separated layers to advanced custom

I. Use animations from "Rendered animations" folder.
1) Open your work and drag and drop animations from "Rendered animations" folder to your project.
2) Edit colors.
3) Add glow effect.

4) Add motion blur effect to imitate the fast motion if you want

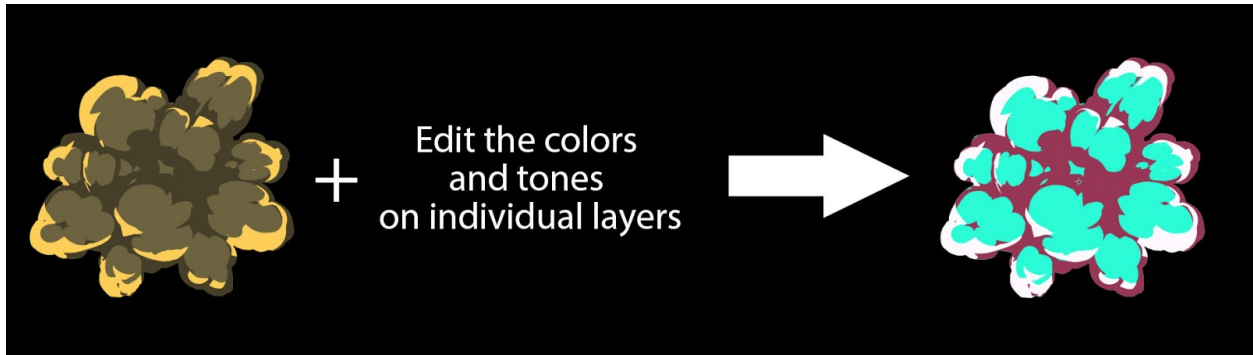

5) Render

II. Use separated layers of animations to advanced custom.

1) Open your work

2) Drag and drop animation layers from "Raw layers" folder to your project:
put a layer ".._fill.mov" above your work layer and put layers ".._shadow.mov",
".._lighting.mov",".._flame.mov" on top of them.

exploision_02_**fill**.mov   exploision_02_**shadow**.mov   exploision_02_**flame**.mov

3) Edit colors of layers.
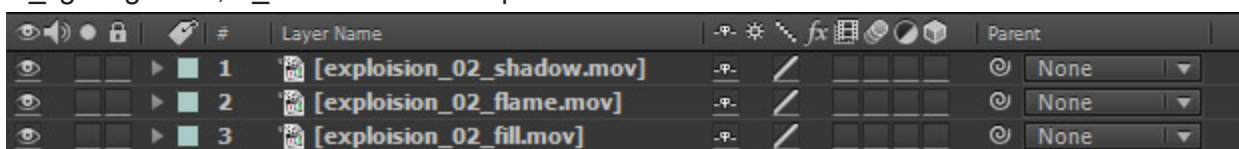

4) Add glow effect.

5) Add motion blur effect to imitate the fast motion

6) Render.

_____

For example, how to work in After Effects:
1) Open your work or create a new composition(Ctrl+N)
2) Drag and drop animation layers from "Raw layers" folder to your project:
put a layer ".._fill.mov" above your work layer and put layers ".._shadow.mov",
".._lighting.mov",".._flame.mov" on top of them.

3) Add "Hue/Saturation" effects to each layers and edit colors:
Select a layer > right-click > Effects > Color Correiction > Hue/Saturation
4) Add "Radial blur" effect to imitate the fast motion
Select a layer > right-click > Effects > Blur&Sharpen > Radial blur(or Directional blur)
5) Edit "duration" to change speed.

p.s. More about frame rate manipulation here:
http://masteringfilm.com/creating-motion-graphics-hidden-gems-chapter-28-%E2%80%93-frame-rate-manipulation/
6) Add to Render Queue(press Ctrl+Shift+/) > Select render setting > Render

_____

Fonts
Fonts in the project not included, but it's free to download:
- "LACONICK" http://www.1001fonts.com/laconick-normala-font.html
- "East Market" http://www.1001fonts.com/eastmarket-font.html
